The following list is intended to aid in removing the lab from the ship and making it ready to return to the UECVP. Any questions, concerns, or discrepancies noted should be referred to the UECVP Manager (Timothy W. Deering 302-645-4338 or deering@udel.edu).

- The lab should be clean and dry. No scientific equipment, chemicals, supplies, or waste are to be left in the lab.
- Complete and return the Evaluation Form in this packet.
- Turn off all equipment including the chiller units. Unplug the water heater.
- Disconnect the fresh water, salt water hoses, and sink/HVAC drain hoses. Drain and stow them in the lab. Replace the cam-lock covers on all fittings.
- Remove any cable pass cowls and stow in the lab on the racks provided. Put the cover plates on all wire passes.
- Put cover plates on all windows.
- Turn the switch on the emergency light to the "Off" position.
- Disconnect the electrical cable and stow inside the lab. Place the covers on the electrical receptacles.
- Make sure all drawers are latched shut and lose items are secured.
- Lock the lab and make suitable arrangements to return the keys to the UECVP (send them with the truck driver, mail them, etc.).
